### **YOU ARE SAFER AT HOME.**

Our number one goal is to ensure that the health care system has more beds, frontline health care workers and critical care capacity than the number of people who will become severely ill and need them. Our collective efforts through Safer at Home are designed to help us accomplish our goal by flattening the curve and slowing the spread of COVID-19 in Wisconsin.

### **You are not alone. We are in this together.**

Wisconsin is resilient. [Resilient Wisconsin](#) will help us grow as a state in the face of COVID-19. We know many of you are experiencing this stress on the frontlines of the pandemic. We can't change our current reality, but we can change how we react to that stress. As we work to flatten the curve, see the dedication of our first responders and health care professionals. It is admirable, and it is surely also exhausting.

It's OK for heroes to ask for help, too. We encourage you to reach out and remember that being resilient does not need to mean being alone. Even in this time of physical distancing, we all need to remember the importance of human connection. You are not alone. We are in this together. Do not hesitate to ask for help if you're feeling overwhelmed.
