Case Updates and Monitoring:

Wisconsin State Cases:

- Information on most up to date case counts statewide can be found [here](#).

****Sheboygan Case Updates:**

- Sheboygan County currently has 45 confirmed cases of COVID-19. Of those, 31 cases have recovered and are no longer ill. Of the active cases, 3 are currently hospitalized.
- 19 confirmed cases are associated with the Sunny Ridge outbreak. Of those, 3 are active, 14 are recovered, and 2 are deceased. The individuals who passed away are in the 60+ age group.
- Active cases** are defined as those individuals who are currently ill and requiring medical care or are in isolation.
- Recovered cases** are defined as confirmed cases where at least 3 days/72 hours have passed since recovery, defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms, **AND** at least 7 days have passed since symptoms first appeared.
- Negative Tests** are defined as a COVID-19 test with a negative result that was reported to Public Health. For information on testing, see WI testing priorities and procedures section.

Highlights of what is NEW in Today's Update

- Sheboygan Case Counts
- Key Community Messaging--Gov. Badger Bounce Back

Updated information is denoted by a ** prior to the bullet in the report below

TODAY'S KEY COMMUNITY PREVENTION MESSAGING:

Boxing in COVID-19 So We Can Re-Open Wisconsin

It is now time to move from our initial response to COVID-19, which has been to keep all Wisconsinites at home to prevent spreading this disease. Once we reduce the transmission of COVID-19 and meet the Badger Bounce Back criteria, we can begin to allow people to interact, and more importantly get Wisconsinites back to work.

1. Symptoms

Over the course of 14-days we consistently see fewer and fewer people reporting flu-like illnesses and COVID-like cases. This is called a downward trajectory.

2. Cases

Over the course of 14 days we consistently see fewer and fewer positive cases of COVID-19 as a percentage of total tests.

3. Health Care System

Our hospitals can treat all patients without crisis care and there are robust testing programs in place for at-risk health care workers, with decreasing numbers of infected health care workers.

4. Testing

Every Wisconsin resident who has symptoms of COVID-19 will be able to get a lab test. Results will be reported to the patient and public health within 48 hours of collection.

5. Contact Tracing

Testing without contact tracing will not result in controlling the spread of the virus. Every Wisconsin resident who tests positive for COVID-19 is interviewed within 24 hours of test results and their contacts are interviewed within 48 hours of test results.

6. Protective Equipment

All health care and public safety entities will need to have adequate PPE and supplies to conduct COVID-19 testing, patient care, and public safety work.

The Badger Bounce Back: Wisconsin's Plan to Get Moving Again

Badger Bounce Back is Wisconsin's plan to decrease COVID-19 cases and deaths to a low level and increase capacity in our health care system so that a phased reopening of businesses is possible. And that means people can get back to work. In order to turn the dial on Safer at Home, we need to increase lab capacity and testing; increase contact tracing and support for isolation and quarantine; track the spread of COVID-19; increase health care capacity; and procure more personal protective equipment. Decisions to move from phase to phase are guided by data, which allows us to re-open while preventing a second wave of COVID-19.

Safer at Home has saved lives, protected health care workers and critical employees, and prevented hospitals from being overrun, but it is not a workable solution for our economy or our way of life in the long-term. The Badger Bounce Back moves from boxing in Wisconsinites to boxing in COVID-19.

****IMPORTANT NOTE ON FUTURE UPDATES****

Due to feedback on the length and repetition of this update, we will be changing the way in which we report our updates. After **1 week** of information not changing, we will remove it from the physical update. This will help to provide a more concise update, highlighting the newest information. All of the information that is removed from the update after 1 week can be found on the website:
<https://www.sheboygancounty.com/departments/departments-f-q/health-and-human-services/public-health/communicable-disease/coronavirus-covid-19>

Sunny Ridge Outbreak Updates:

- Currently 19 confirmed cases are associated with the Sunny Ridge outbreak. Of those, 3 are active, 14 are recovered, and 2 are deceased.
- Public Health is currently working on a contact investigation associated with Sunny Ridge Nursing & Rehabilitation Center since Tuesday, March 31st.
- [National Guard Testing at Sunny Ridge Press Release](#)
- [Initial April 4th, 2020 Press Release](#)

Healthcare System Updates:

- Ascension Medical Group Wisconsin launched a [Respiratory Care Site in Sheboygan](#) last week, that is dedicated to caring for COVID-19 suspected or confirmed patients. Respiratory Care Sites are by appointment only. Patients must be pre-screened by an Ascension Wisconsin provider before visiting a respiratory care site.
