Case Updates and Monitoring:

Wisconsin State Cases:

- Information on most up to date case counts statewide can be found [here](#).

****Sheboygan Case Updates:**

- Sheboygan County currently has 46 confirmed cases of COVID-19. Of those, 35 cases have recovered and are no longer ill. There are no confirmed COVID-19 cases currently hospitalized.
- 19 confirmed cases are associated with the Sunny Ridge outbreak. Of those, 2 are active, 15 are recovered, and 2 are deceased. The individuals who passed away are in the 60+ age group.
- Active cases** are defined as those individuals who are currently ill and requiring medical care or are in isolation.
- Recovered cases** are defined as confirmed cases where at least 3 days/72 hours have passed since recovery, defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms, **AND** at least 7 days have passed since symptoms first appeared.
- Negative Tests** are defined as a COVID-19 test with a negative result that was reported to Public Health. For information on testing, see WI testing priorities and procedures section.

TODAY'S KEY COMMUNITY PREVENTION MESSAGING:

WI State Emergency Operations Center's Response

The [State Emergency Operations Center](#) has brought together government leaders with some of the best and brightest minds in business and technology – all Wisconsinites – to help reduce the spread of COVID-19. Teams at the State Emergency Operations Center are working together to tackle the challenges we face during the COVID-19 pandemic here in Wisconsin. They are creating and implementing plans on important topics like essential supplies, contact tracing, and lab capacity, in an ever-changing situation.

The Badger Bounce Back: Wisconsin's Plan to Get Moving Again

[Badger Bounce Back](#) is Wisconsin's plan to decrease COVID-19 cases and deaths to a low level and increase capacity in our healthcare system so that a phased reopening of businesses is possible. And that means people can get back to work. In order to turn the dial on Safer at Home, we need to increase lab capacity and testing; increase contact tracing and support for isolation and quarantine; track the spread of COVID-19; increase health care capacity; and procure more personal protective equipment. Decisions to move from phase to phase are guided by data, which allows us to re-open while preventing a second wave of COVID-19.

[Safer at Home](#) has saved lives, protected health care workers and critical employees, and prevented hospitals from being overrun, but it is not a workable solution for our economy or our way of life in the long-term. The Badger Bounce Back moves from boxing in Wisconsinites to boxing in COVID-19.

Sunny Ridge Outbreak Updates:

- Currently 19 confirmed cases are associated with the Sunny Ridge outbreak. Of those, 2 are active, 15 are recovered, and 2 are deceased.
- Public Health is currently working on a contact investigation associated with Sunny Ridge Nursing & Rehabilitation Center since Tuesday, March 31st.

Executive Orders Updates:

- [Order to Rescind Sheboygan County Campground Order- 4/21/2020](#)
- Gov. Evers [Emergency Order #31 Badger Bounce Back](#) - 4/20/2020

Healthcare System Updates:

- HSHS St. Nicholas Hospital--HSHS St. Nicholas Hospital reminds all community members that the Emergency Department (as well as the hospital) is open and available to provide all types of emergency medical care, 24/7.
 - Seeking care for medical emergencies, such as chest pain, stroke symptoms, injuries and more, should never be forgone or delayed – even in the midst of a pandemic.
 - The hospital is well-prepared to provide all types of emergency care and has carefully-designed protocols in place to prevent the spread of all infectious diseases, including COVID-19, to patients and colleagues.
