- Public Resources
  - [Cleaning & Disinfecting Decision Tool](#)
  - [Reopening Guidance for Cleaning and Disinfecting](#)

Updated information is denoted by a \*\* prior to the bullet in the report below

## TODAY'S KEY COMMUNITY PREVENTION MESSAGING:

### The Badger Bounce Back: Wisconsin's Plan to Get Moving Again

[Badger Bounce Back](#) is Wisconsin's plan to decrease COVID-19 cases and deaths to a low level and increase capacity in our healthcare system so that a phased reopening of businesses is possible. And that means people can get back to work. In order to turn the dial on Safer at Home, we need to increase lab capacity and testing; increase contact tracing and support for isolation and quarantine; track the spread of COVID-19; increase health care capacity; and procure more personal protective equipment. Decisions to move from phase to phase are guided by data, which allows us to re-open while preventing a second wave of COVID-19.

The Badger Bounce Back plan includes [gating criteria \(metrics and data\)](#) that we will use to determine when we can begin to allow people to interact and, more importantly, get Wisconsinites back to work.

[Safer at Home](#) has saved lives, protected health care workers and critical employees, and prevented hospitals from being overrun, but it is not a workable solution for our economy or our way of life in the long-term. The Badger Bounce Back moves from boxing in Wisconsinites to boxing in COVID-19.

## Health System Updates:

- **\*\*** Aurora Sheboygan Memorial Medical Center's Emergency Department is open and available to provide all types of emergency medical care. We encourage patients to seek care for medical emergencies such as chest pain, heart attack, stroke symptoms, injuries and more, and should not delay care during the pandemic. We are well-equipped and taking proactive measures to prevent the spread of all infectious diseases, including COVID-19.

## Sunny Ridge Outbreak Updates:

- Currently 19 confirmed cases are associated with the Sunny Ridge outbreak. Of those, no cases are active, 17 are recovered, and 2 are deceased.
